Team Name: Deep Optimum

Team Member UNI:
Beom Joon Baek - bb2763
Bennington Li - wl2750
Yifan Zang - yz3781
Zhuoxuan Li - zl2890

Part 1:
The demo was scheduled on Sunday Nov 22nd 9 PM EST. The first demo was mediocre because there were still a lot of features yet to be implemented. The TA reminded us of a few constraints we should put on user registration. Other than that, we did not make a lot of modifications on the original plan.

Part2:
Backend repo: https://github.com/Deep-Optimum/BackEnd
Frontend repo: https://github.com/Deep-Optimum/Front-End

Releases:
https://github.com/Deep-Optimum/BackEnd/releases
https://github.com/Deep-Optimum/Front-End-Demo/releases

All files in the repository should be up-to-date.

Part3:
